Using the Dragon Dictation Box

Are your voice commands not working consistently in a particular application? If so, follow these **two easy steps** to better dictation:

1. Place your cursor where you want the text to appear in your current application. Then open the **Dragon Dictation Box** by either:
   - Clicking the **Tools menu** and choosing **Dictation Box**
   - Saying “**Show Dictation Box**”
   - Pressing **Ctrl + Shift + D**

2. **Dictate** into the Dictation Box, then click **Transfer**. Your dictation will automatically appear after the cursor in the other application. It’s that easy!
