One of the best features of Inspiration 8 is the “Learn To Use” feature. When you first double-click on the Inspiration icon on your Desktop, Inspiration will open and you will see the Inspiration Starter window:

Click on the “Learn to Use” icon (the graduation cap) and it will take you to the following window:

Click on the plus sign (+) next to “Training Videos” and when it unfolds choose from the list of training videos to watch.

You must be connected to the Internet for these videos to be available.
You will notice that you can choose between Large and Small videos. They both have the same content, but the small one requires less bandwidth and takes less time to load.

Once you have selected one to watch, click on “Open.”

A video will open that will walk you through the steps of using Inspiration.

These are great, short videos. They will assist you in learning the basics of using Inspiration.

Remember, you must be connected to the Internet in order to access these videos.
